

Recording Calcimeter with Data Acquisition

Brand: OFI Testing Equipment, Inc.

Product Code: 152-97

Availability: Call for availability

Lead Time: 60

Description

The Calcimeter is used to determine the amount of Calcium Carbonate (CaCO_3) and Magnesium Carbonate (Dolomite) in a sample of alkaline earth carbonates such as oil well cores or drilled cuttings.

Calcite buildup in drilling fluids and in water treatment processes causes scaling problems. Data from the Recording Calcimeter can help determine the proper chemical treatment.
